HD Supply Fire Protection receives Flexhead Industries' Distributor Excellence Award

In 2016, HD Supply Fire Protection led all FlexHead Industries distributors in both dollar sales growth and percentage sales growth.

The Fire Protection team was instrumental in introducing and promoting FlexHead's new and current products from the manufacturer's complete line of one-piece, flexible sprinkler connections for suspended ceilings to the U.S. fire protection market. These products dramatically reduce installation time and maintenance costs and promote overall facility safety by allowing rapid inspection, maintenance and relocation of sprinklers.

As a result, HDSFP successfully increased its FlexHead 2016 sales, and was presented with the FlexHead "Distributor Excellence" Award for 2016.

Congratulations!
